- Basic MERN
- Ai Tools

LANGUAGES

- English (Proficient)
- Hindi (Fluent)
- Bengali (Native)

INTERESTS

- Exploring Emerging Technologies
- Tackling Coding Challenges
- Interactive Digital Communities
- Engaging in Online Gaming

WORK EXPERIENCE

Fresher Frontend Developer (Self-Learning)

- Developed multiple frontend projects using React.js, focusing on reusable components, responsive design, and clean UI implementation.

2024 - PRESENT

PROJECTS

TravelBooker

- Developed a responsive travel booking frontend application using React.js. Implemented reusable components, modern UI layouts, and responsive design to enhance user experience. Deployed the application on Vercel. Gained hands-on experience with React component-based architecture and frontend development best practices.

CookMate

- Developed CookMate a MERN-stack recipe platform featuring JWT-secured user accounts and real-time API integration. Solved complex cross-origin authentication challenges and implemented a localized storage fallback for distributed hosting on Vercel and Render. Features high-performance recipe searching, search history, and a modern, animated user interface

NodeKit

- Developed a secure Node.js and MongoDB backend for a privacy-centric todo application. Implemented JWT authentication, bcrypt hashing, and a unique secondary "privacy lock" system for sensitive tasks, alongside integrated email OTP services via Resend.
